Does canon pixma mg3050 support airprint

More and more, people are asking us if their copier or printer supports AirPrint, Apple’s technology that allows people to print wirelessly from their Mac, iPhone, iPad, or iPod device. It’s a valid question as while AirPrint is built into most current printers and copiers, there are obviously some brands and models that are not AirPrint capable. So if you are our client and as such are wondering whether your Canon, HP, Kyocera, Lexmark, Ricoh or Sharp device is blessed with AirPrint or not, wonder no more! Or even if you are not our client — yet again, wonder no more! Check Apple's list of AirPrint enabled devices Click HERE to see a handy dandy list Apple has compiled of the printers and print servers that support AirPrint. As it’s sorted by manufacturer, it’s fairly easy to navigate and to find your particular device, if it’s there. Apple keeps the list up-to-date, so if the machine you are looking for is on that list, it supports AirPrint. If it is not on that list, it does not — regardless of what the copier or printer manufacturer says. On the list, but no banana? Get help. If your device is AirPrint-enabled but it seems the technology is not working, let your IT services people know and if you subscribe to our managed IT support services, be sure to reach out to us. Hopefully this helped. ... because that’s what we do. We are here to help. About R.K. Black, Inc. R.K. Black, Inc. is an Oklahoma City-based, family-owned leading provider of office technology solutions to small and medium-sized businesses in Oklahoma and Kansas. We specialize in everything business technology from copier, fax, printer and scanner technology to document management, onsite paper shredding services, VoIP phone systems and managed IT support to video surveillance solutions. If you want to learn more about us, feel free to explore the website, read our other blogs or click the button below to be contacted by one of our reps and tell you! Also, be sure to keep watching our social media channels on Facebook and Twitter for more business tips from our blog. AirPrint enables instant printing of printing of photos, email, web pages and documents from iPad, iPhone, and iPod touch without the need to install drivers or download software. Your device automatically detects an AirPrint-enabled printer on your Wi-Fi network so simply select an AirPrint printer and print. The Apple device and the PIXMA printer that you wish to use must be connected to the same wireless network (sometimes referred to as WLAN). Please view our PIXMA wireless connection setup guides for assistance in connecting your PIXMA printer. Please find the list of PIXMA printers that are compatible with Apple AirPrint. The settings required for using AirPrint can be configured remotely using the Remote UI. It is necessary to log in with administrator privileges to configure the settings. 1. Start the Web browser and log in as an administrator. http:/// For more information, see "Remote UI." 2. Click [Settings/Registration] → select [Network Settings] in → click [AirPrint Settings]. If you are using a mobile device, such as an iPad, iPhone, or iPod touch, read "click" as "tap" in this section. 3. Specify the required settings → click [OK]. [Use AirPrint]: Select this check box. [Printer Name]: Enter the name of the machine. If an mDNS name has already been registered in [mDNS Settings] ([Network Settings] in [Preferences] (Settings/Registration)), the registered name is displayed. [Location]: Enter the location of the machine. If a location has already been registered in [Device Information Settings] ([Device Management] in [Management Settings] (Settings/Registration)), the registered name is displayed. [Latitude]: Enter the latitude of the location where the machine is installed. [Longitude]: Enter the longitude of the location where the machine is installed. [Auto Acquire]: Automatically sets the latitude and longitude of the location where the machine is installed. IMPORTANT If you select [Use AirPrint], the following settings are enabled. [Settings/Registration] → [Network Settings] in → [HTTP Settings] → [Use HTTP] [Settings/Registration] → [Network Settings] in → [IPP Print Settings] → [Use IPP] [Settings/Registration] → [Network Settings] in → [DNS Settings (IPv4)] → [Use mDNS] [Settings/Registration] → [Network Settings] in → [DNS Settings (IPv6)] → [Use mDNS] [Settings/Registration] → [Network Settings] in → [Network Link Scan Settings] → [Use Network Link Scan] NOTE If you change a printer name that has been previously set, you may become unable to print from a Macintosh. This is because the mDNS name used for IPv4/IPv6 is changed. In this case, add the machine to the Macintosh again. Entering the printer name makes it easier to identify multiple printers that support AirPrint. 1. Press (Settings/Registration). 2. Press [Log In] → enter the System Manager ID and System PIN → press [Log In/Out]. 3. Press [Preferences] → [Network] → [Use AirPrint]. 4. Press [On] → [OK]. IMPORTANT If you press [On], the following settings are enabled. [Preferences] (Settings/Registration) → [Network] → [TCP/IP Settings] → [Use HTTP] [Preferences] (Settings/Registration) → [Network] → [TCP/IP Settings] → [IPP Print Settings] [Preferences] (Settings/Registration) → [Network] → [TCP/IP Settings] → [DNS Settings] → [mDNS Settings] → [Use IPv4 mDNS] [Preferences] (Settings/Registration) → [Network] → [TCP/IP Settings] → [DNS Settings] → [mDNS Settings] → [Use IPv6 mDNS] [Preferences] (Settings/Registration) → [Network] → [TCP/IP Settings] → [Use Network Link Scan] 5. Press [Device Position Information Settings] → specify the latitude and longitude of the machine → press [OK]. IMPORTANT The printer name and location can be checked by following the procedures below. To check the printer name, see the value for the mDNS name in [mDNS Settings] ([Network] in [Preferences] (Settings/Registration)). To check the location, see the value for the location in [Device Information Settings] ([Device Management] in [Management Settings] (Settings/Registration)). All-In-One colour printer, scanner and copier with Wi-Fi connectivity and cloud features - ideal for home users who want the freedom to print from their tablet, smartphone, laptop, or camera. Benefits Copy, print and scan with an affordable Wi-Fi All-In-One Connect to your smartphone or tablet with the Canon PRINT app Print from your favourite cloud services Print more pages for your money with XL ink options Get creative with Easy-PhotoPrint+ Take a more detailed look into the Canon PIXMA MG3050 Series Find out more about the Canon PIXMA MG3050 Series, its features and what it can do. Print directly from cloud Convenient and easy to replace Turns on when you start printing View full specification What's in the box All-In-One printer - PIXMA MG3050 series FINE Cartridges Power cord Setup CD-ROM (CD only for Windows - Mac drivers available online) Manuals and other documents PIXMA MG3050 Series Ratings & Reviews With Wi-Fi you can print from smartphones and tablets. PIXMA cloud ready printers give you the freedom to print from online cloud services direct from your smart device. We use cookies to provide you with the best possible experience in your interactions with Canon and on our website - find out more about our use of Cookies and change your cookie settings here. You agree to our use of cookies on your device by continuing to use our website or by clicking I Accept. Please note: The following screenshots have been taken using an iPhone running iOS12.3.1. The layout may differ very slightly from your display depending on your device and the version of iOS you have installed; however, the functionality will essentially be the same. Check that your Canon PIXMA printer is turned on and connected to the same wireless network (sometimes referred to as WLAN) as your Apple device. Please view our PIXMA wireless connection setup guides for assistance in connecting your PIXMA printer. From an app on your device, tap either [, or] (depending the version of iOS you have installed) to display the menu options, and then scroll across & tap on the [Print] icon. From [Printer Options] select the PIXMA model that you want to use. (In this example, we will use the TS9100 series). Please note: Ensure that you are within range of your printer. All AirPrint-enabled printers within range will be displayed. Select the number of copies you require & tap [Options] if you want to change double-sided prints, colour settings etc. When ready, tap [Print] to start printing. Important: Some apps do not support AirPrint and some printer options may not be displayed. If an app does not let you access the printer options, you cannot print from that app. Please note: Printer options can differ depending on the app and printer you are using. Normally, when you tap print and select a model name, the displayed printer options will include up to the following four options: Printer: Select a model that can be used on your wireless network or WLAN Copies: Select the number of print copies Double-sided Printing: If the model supports double-sided printing, you can select On or Off Range: The page range can be used only with specific apps and file types (such as PDF files) Colour: Select [Black & White] to enable monochrome printing. Paper Size: For PIXMA models launched before the second half of 2016, the paper size is selected automatically according to the app being used on the Apple device and the region in which AirPrint is used. When Apple's photo app is used, the default paper size 4"x6" or KG. When documents are printed from Apple's Safari browser, the default paper size in Europe is A4. For printers released after 2016, the paper size directly set on the printer (using the operation panel) is used. Important: Your app may support different paper sizes If you are experiencing issues with your PIXMA printer when using Apple AirPrint please refer to the troubleshooting section of this guide.
